

SKILL ASSESSMENT PROCESS AT CSM

Technology is evolving very fast !!

All of us need to be competitive and competent enough to sustain in this rapid changing technology world.

In order to evaluate appropriate skill levels from time to time, we are happy to announce the Online Skill Assessment Module in Kwantify that would suggest improvement of relevant skills & keep ourselves competent with time.

It will help in checking the skill GAP and the Training needs, which will lead us to map the Organisation business objective & GOAL.

Points to be noted:

- The skill Assessment process has been made MANDATORY for all with Core technologies and optional for other technologies.
- One needs to appear at least one skill assessment mandatorily in a year, as per his/her related Technology/Skill.
- The skill assessment module has been configured with the Appraisal Module for an easy and accurate Annual Skill evaluation.
- You will be able to see your Skill Assessment page (Question, Result & Score) in Kwantify itself.
- You will be able to avail the Tests as per your eligible criteria (Years of Exp, Job role etc).
- Please go through the “**Kwantify-Skill Assessment**” document carefully to get more information about the module.

[Please feel free to contact for any issues or suggestions for improvisation.](#)

!! BEST OF LUCK !!
